

AMERICAN INDIAN TRIBES LESSON

Thank you so much for your purchase! I am so grateful for your support. Please, however **do not post** any of these resources to a publicly-accessible website like a blog, Wix, Weebly, or school webpage. This allows **any student** to find the answer keys! You are more than welcome to post them on a password-protected site that only your students can access, however, like Google Classroom. Google Drive versions of all the activities are included below.

Essential Questions: *How did the culture of American Indian tribes vary across North America?*

Lesson Plan

This lesson will likely vary for you depending on where you are in the US. Most curricula have a focus on the Native American groups that existed in their regions. So, you might want to edit it slightly to highlight tribes that were local to your area.

Start things off with the PowerPoint and guided notes sheet on Native American groups and tribes. The Google Slides [version can be found here](#) while a ["flipped classroom" video version is here](#).

Also included is a map that you can have students complete as you cover the groups.

Following this you have a couple options. First is the "One Pager" project on American Indian tribes. You can either assign or have students select one of the 30 tribes listed and have them create a "1-pager" on it. A Google Doc version of the [directions is here](#).

This project likely requires online research or a trip to your school's library. The [Museum of the American Indian](#) has good resources online for research. If you prefer not to devote the time to the 1-pager project, you can use either one of the reading activities.

First is a primary source analysis of the Iroquois constitution. A Google Doc version of this [can be accessed here](#).

The other option is a reading Iroquois Confederacy with the reading, worksheet, and interactive notebook page. A Google Doc version of the [reading and worksheet can be accessed here](#).

Extension Resources

Good videos to use include this [one on Hiawatha](#), the [first Crash Course](#), or this [great overview of Native American cultures](#) in North America. This very [simple video on tribes](#) can be used for remediation.
